You can Pre-register your shipments in Correos, both national and international

Web service response includes shipping code for tracking and label ready to print

You can also obtain the necessary documentation for your international shipments

This web service has other operations such as canceling, modifying, etc., but the most used are PreregistroMultibulto and PreregistroEnvío

Interfaz Web Service PreRegistro\_EN

# API Pick-up

Once you have pre-registered your shipments you can request to pick them up at your warehouse\* or at the address of your clients

You can also tell us if you need Correos to carry the printed label at the pick-up

This web service allows you to request, cancel and also consult your collection requests

\* except for agreed periodic collection

# API Track & Trace
